

"Making Sites That Make Sense"
a division of Southwest Technology Associates, Inc.
740 San Mateo Boulevard, NE
Suite A-3
Albuquerque, New Mexico 87108

This is an example of a document that was accessed via a hyperlink to a stored document in a TeamWeb website, using the VersaSite control panel and the hyperlink feature in the VersaSite WYSIWYG content editing tool set. There are dozens of text and html editing features included in our VersaSite content management control panel, which is built into every custom-built Teamweb website.

With this hyperlink tool, you can instantly include document or website "hyperlink" references within your website content that refer to documents or websites that you desire to direct a viewer of your website to. No website programming or programs required, just click and go.
